A close-up photograph of a lush green hedge. The top portion of the image shows a different type of foliage, possibly a cedar or juniper, with feathery, scale-like leaves. Below this, the main body of the image is filled with a dense, uniform hedge of a different plant, likely a boxwood or similar, characterized by its fine, needle-like leaves. A semi-transparent blue rectangular box is overlaid on the bottom right of the image, containing white text.

**Premium Quality,
Thriving,
Finished Hedges.**
Finished in 1 day

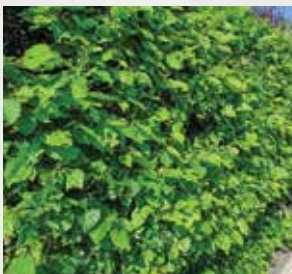

Our history

InstantHedge® has been showing landscapers and property owners a better way to hedge since 2018, with our first hedges being planted in 2014. At first, we had only a handful of varieties available for sale, but we have increased our offerings over time and are now growing over 20 different hedge varieties.

OUR FARM

The InstantHedge® farm in Canby, Oregon has over 50 miles of hedges in production. Our expert team cultivates the plants from cutting or seed to finished hedge.

WHAT WE OFFER

**Premium
Quality
Finished
Hedges**

01

**20+ Varieties
of Hedges**

02

We do all of our own propagation to ensure the highest quality possible from the very beginning.

Finished hedges in a day, only possible with InstantHedge®

03

3 Size Options for your designs

04

Nationwide, Year-Round Shipping

Growing Process

Our hedges are grown in containers or in the ground.

STEP 1

We start our own cuttings and seedlings in-house to ensure the highest quality from the beginning.

STEP 2 – FOR MINIHEDGES

**Ready
to Ship**

STEP 2 – FOR INSTANTHEDGES

03

Planted in Field

The hedges are planted out using GPS technology when they are just a few inches tall in their final spacing - 10" for the field grown hedges.

04

Growing & Root Pruning

05

Shoot Pruning

Ready to dig from field and place in biodegradable cardboard containers for shipping

Shipping

Shipped nationwide from Canby, Oregon

2 week
turnaround time

Box trucks available
for limited access sites

Dry and refrigerated
53' vans for year-round shipping

Lift gate service and final mile
delivery options available

Ordering Process

GET A QUOTE

Contact us to get a quote
for your project with
plant and shipping costs.

PAYMENTS

Once your order is confirmed, we will
need full payment 2 weeks before your
requested delivery date. We accept
checks, wire transfers, and credit card
payments with a 3.5% processing fee.

SHIPPING

The shipping process typically takes around
two weeks. Two weeks plus 1 installation day
for a mature hedge? Sure beats the old
fashioned way that takes 5-6 years...

How are the hedges palletized?

**This is generally what
fits on a 53' semi:**

- 30 Pallets InstantHedge® = 300 Linear Feet
- OR 26 Racks MiniHedge = 1,664 Linear Feet
- OR 26 Racks MiniHedgeXL = 834 Linear Feet
- OR 28 mixed pallets and racks

Testimonials

We finished planting the InstantHedge yesterday and it looks amazing! I can't thank you enough. The privacy issue was completely fixed in only a few days and because of you I don't feel like we need to move anymore.

Danielle, Pennsylvania

We just had a customer install 20+ units of this [boxwood] hedge. Everyone is so happy with the end result. Landscaper loved how easy it was to install, homeowner was thrilled he didn't have to wait three years for a finished hedge.

Pierson Nurseries, ME

Yes, everything got here and looks great. Thanks again for everything. I've never had a customer be so happy to see hedging before.

Barrett's Horticultural Services, VA

These boxwoods are magic. Thank you so much for all your help along the way – you have been absolutely incredible to work with.

Cristy, MI

I was just at our project site and saw the delivered hedges – they look amazing and are exactly the right size for our mazes!

Howard Williams, NY

I just wanted to take a second and say thank you for all of your help giving my family such a wonderful upgrade to our backyard's sense of peace and place. By the way, as a testament to how helpful you were and to how easy these are to install: I did the entire excavation and installation completely solo, with the exception of the unloading of the truck. The contractor that was scheduled to transport the hedges to the trench in the backyard this weekend had a scheduling issue and I managed to just use a Toro Dingo tx1000 rental to do the whole job myself. 143 linear ft! Woohoo!

Kyle, MN

I am still amazed at how fast those got planted! Everything looks so good. It's been a pleasure working with you and I'm sure there will be more projects in the future.

Floret, WA

Just fyi – your beech hedge product is turning out to be a highly praised product. Everyone wants to know where to get it.

Andrew Beedy Wholistic Farming, MA

Boxwoods

We offer 3 different Boxwood varieties, with different qualities.

Green Mountain Boxwood

A beautiful boxwood with a moderate growth rate and lovely year-round color. One of the top varieties with natural blight resistance.

Common Boxwood

The original, species boxwood beloved for centuries. Grows quickly, making it suitable for taller boxwood hedges.

Schmidt Boxwood

An uncommon variety that we love for its narrow growth habit, making it perfect for hedges with a narrow footprint.

| HEDGE NAME | USDA HARDINESS ZONES | DEER RESISTANT | MINIHEDGE | MINIHEDGEXL | INSTANTHEDGE® |

| Buxus sempervirens 'Schmidt' | 5-8 | ✓ | ✓ | ✓ | ✓ |

Quick Facts on Boxwood

SUN EXPOSURE

Sun or partial shade — both Common Boxwood and Green Mountain do well in a variety of light conditions.

SOIL

Well-drained soil is important. Boxwoods don't like overly wet or clay soils.

WATERING

Moderate watering — especially important right after planting; once established, they are relatively low maintenance.

PRUNING & SHAPE

They respond very well to pruning (annual shearing is often enough).

SUITABILITY

Because they're evergreen, deer-resistant, and maintain color all year — they're great for formal gardens, structured hedges, garden borders, courtyard gardens.

Cherry Laurels

We offer 5 Prunus varieties, each with distinct benefits:

English laurel

A fast-growing option with glossy foliage, it tolerates aggressive pruning and is a great choice for quickly achieving a big evergreen wall.

Schip laurel

A tall, narrow variety with attractive, dark green foliage that is more finely textured than English laurel.

Portuguese laurel

A more heat-tolerant laurel with richly colored foliage and contrasting bright red stems. Highly disease resistant as well.

NEW FOR 2026

Otto Luyken laurel

A compact, dwarf variety that is perfect for shorter hedges. Lovely dark green foliage.

COMING SOON

Russian laurel

A new variety similar to Schip laurel but with improved cold tolerance!

| HEDGE NAME | USDA HARDINESS ZONES | DEER RESISTANT | MINIHEDGE | MINIHEDGEXL | INSTANTHEDGE® |
|---|----------------------|----------------|-----------|-------------|---------------|

| <i>Prunus laurocerasus</i> 'Reynvannii' | 6-9 | ✓ | ✗ | ✗ | ✓ |
| <i>Prunus lusitanica</i> | 7-9b | ✓ | ✗ | ✗ | ✓ |

Quick Facts on Cherry laurels

SOIL

Many laurels are tolerant of a variety of soils — clay, loam, sand — especially Portuguese Laurel. Good drainage still helps.

WATER / DROUGHT

Once established, laurels often handle drought fairly well. Still, young plants benefit from regular watering until root system is strong.

MAINTENANCE / PRUNING

Should be pruned/shaped regularly if used as a formal hedge, to maintain neatness and density. Varieties like Schip Laurel, with narrower habit, need less intensive pruning than more vigorous types.

Arborvitae

We offer 4 different Thuja varieties, each with unique benefits:

American Arborvitae

Fast-growing, lush, and dense with beautiful feathery foliage.

Emerald Green Arborvitae

Dense, narrow growth habit with vibrant green foliage.

Virescens Western Red Cedar

Fast, upright grower with fine textured, deer-resistant foliage.

Green Giant Arborvitae

Incredibly fast growth rate and beautiful foliage on this vigorous, deer-resistant hybrid make it the industry standard for screening.

| HEDGE NAME | USDA HARDINESS ZONES | DEER RESISTANT | MINIHEDGE | MINIHEDGEXL | INSTANTHEDGE® |
|------------------------------|----------------------|----------------|-----------|-------------|---------------|
| Thuja occidentalis | 3-8 | ✗ | ✗ | ✗ | ✓ |

| Thuja plicata 'Virescens' | 5-8 | ✗ | ✗ | ✗ | ✓ |
| Thuja x 'Green Giant' | 5-8 | ✓ | ✗ | ✓ | ✓ |

Quick Facts about Arborvitae

SUN EXPOSURE

Full sun is best; tolerates light shade.

SOIL

Moist, well-drained soils preferred; tolerates clay better than many species.

WATER

Likes consistent moisture, especially during the first year.

CLIMATE

Cold-hardy and reliable in many temperate zones.

Deciduous Hedges

Sometimes you just need a hedge with more seasonal interest, and that's where our line of deciduous hedges comes in.

Why choose a Deciduous Hedge?

Provide a **soft, natural** hedge appearance.

Offer **seasonal color changes** (spring growth, summer density, fall color).

Many species are **very hardy** and adapt to cold climates.

Can create **dense summer privacy**, even though the leaves fall in winter.

Best uses

- Classic garden hedges with seasonal interest.
- Naturalistic or traditional garden designs.
- Long property borders where lush summer growth is desired.

Our deciduous hedges:

Flame Amur Maple

Tapestry Beech

Royal Star Magnolia

European Beech

Hornbeam

Cornelian cherry

| HEDGE NAME | USDA HARDINESS ZONES | DEER RESISTANT | MINIHEDGE | MINIHEDGEXL | INSTANTHEDGE® |

| Fagus sylvatica – Tapestry Mix | 5-8 | ✓ | ✗ | ✗ | ✓ |
| Magnolia stellata 'Royal Star' | 5-8 | ✓ | ✗ | ✗ | ✓ |

More Evergreen Hedges

Evergreen hedges keep their leaves all year long, providing continuous privacy, structure, and color through winter.

Green Spire Euonymus

An excellent Boxwood alternative for areas where Boxwood isn't suitable.

Skyrocket Juniper

Drought tolerant with beautiful blue-green foliage. Grows upward with a lovely texture.

BEST USES

- Privacy screens
- Year-round hedges of any height
- Borders, pathways, classical gardens
- Modern landscapes needing clean lines
- Noise and wind protection

OUR OTHER EVERGREEN OPTIONS

Wichita Blue Juniper

Bright, powder blue foliage and a narrow habit makes this an excellent choice for a unique hedge.

Teton Firethorn

Billows of white flowers in spring are followed by vibrant orange berries in fall. Sharp thorns make this a perfect hedge for security purposes.

| HEDGE NAME | USDA HARDINESS ZONES | DEER RESISTANT | MINIHEDGE | MINIHEDGEXL | INSTANTHEDGE® |

A wide-angle photograph of a large field of hedges. The hedges are arranged in long, straight rows that recede into the distance, creating a strong sense of perspective. The hedges are a vibrant green color, indicating they are well-maintained. Between the rows of hedges are narrow paths of brown mulch. In the background, a dense line of various trees, including some tall evergreens, forms a natural windbreak. The sky above is a pale, overcast blue.
